KNOW THE WEATHER

By E. H. Sims

What is football weather?" Do people really feel better in the fall, when football is played?

There is such a thing as football weather, not because of football but because of the time of the year football is played in the United States.

This sport comes when high pressure systems begin to push down from the north with greater regularity, bringing with them cold, dry air. It is the beginning of the trend toward winter, and there is less rain in the fall than in summer.

Since high pressure usually makes people feel good (low pressure sometimes has a depressing effect), this - combined with cooler weather, and resulting invigoration - combines to produce an energenic feeling, or that "football weather", in the fall when appetite and energy seem to return after a hot summer.

The one '61 car built to back up a long-term warranty

Ford led the way with the one *car beautifully* built to take care of itself . . . and you

On September 29, Ford Dealers set an industry trend—were first to extend their 1961 car warranty from the conventional 4,000 miles or 3 months to 12,000 miles or one full year, whichever comes first.

Why? Because Ford *built the one car* to support such confidence. Ford for 1961 is the *one* car beautifully built to take care of itself!

The '61 Ford was designed and built to the more exacting standards necessary to offer an extended warranty. Ask to see this warranty at your dealer's.

It is significant that Ford has so many take-care-of-itself features not found in other cars, regardless of price. These new Ford features are a triumph of exhaustive research, fine engineering, and quality construction that give you the most reliable Ford ever built. Drive a '61 Ford soon.

HERE'S HOW THE '61 FORD TAKES CARE OF ITSELF

Lubricates itself—You'll normally go 30,000 miles between chassis lubrications. Then a quick, inexpensive Ford Dealer lube job (which costs about $4.00*) will get you set for another 30,000 miles.

Cleans its own oil—You'll go 4,000 miles between oil changes with Ford's Full-Flow oil filter.

Adjusts its own brakes—New Truck Size brakes adjust themselves automatically for the life of the lining.

Guards its own muffler—Rust snuffers are double-wrapped and aluminized—normally will last four times as long as ordinary mufflers.

Protects its own body—A tough underbody paint set specially processed to resist rust and corrosion even to galvanizing the bolt heads beneath the doors.

Takes care of its own looks—See Diamond Luster Finish now and wax.

The eyes of millions look hopefully to America, land of the free and of opportunity for the common man. Next week he exercises his freedom and enjoys the opportunity to vote for the man of his choice to be Pres[illegible] of the United States.

In this great freedom and this great opportunity we all share. It is a privilege and with that privilege, a responsibility.

We owe it to our children, and theirs, to continue to demonstrate the achievements of true government of the people, by the people, for the people. The sharing of the privilege of voting our convictions is a freedom Americans will always hold dear.

Only on this foundation can men's minds grow so that they always can build wisely toward security for all freedoms. All must take part. All must share Democracy.

History shows that no one mind can solve all the problems, as well, as the judgment of a majority of the people themselves. Next Tuesday, November 8, 1960, is one of the days to exercise this judgment.

In a democracy the individual's opportunity under free enterprise—freedom of speech—freedom of worship—freedom from want and from fear, is the hope and goal of mankind. This we protect. This we support. This we share.
